The City will begin to conduct its annual natural gas safety survey starting May 26th. City utility customers and other county residents may be receiving a phone call and will be asked to participate in a 1-minute survey.

Throughout the year the City provides natural gas safety and call before you dig information in utility bills, on the radio, and in the local newspaper for all Kittitas Valley residents. The purpose of the survey is to verify you received and understand the information, and that you know what to do if you smell or hear a gas leak.

The U.S. Department of Transportation Office of Pipeline Safety requires the City to assess the effectiveness of its public education program. If you do not wish to be called please contact the City at 925-8603.

This important safety message is brought to you by the City of Ellensburg Energy Services Department.
