

Your Gas Piping

The house piping from City of Ellensburg's meter to an appliance belongs to the customer; maintaining the house piping and any underground piping is the customer's responsibility. If it is not maintained, it may leak or corrode.

Have a licensed plumbing contractor help locate, inspect and make any necessary repairs. Always locate buried gas lines before digging and dig by hand. Please call the Natural Gas Division at 962.7124 if you have any questions. And if you smell gas dial 911!
